

# Capitaine Train reveals its iPhone App!

Paris - 30th October 2013

As an innovator of rail transport, Capitaine Train has continued its development and has revealed its iPhone and iPod Touch App. The new iOS 7 design allows users to enjoy the full convenience of all of the Capitaine Train features on their phone.

## Purchase train tickets for all over Europe

Capitaine Train is the first independent application which offers train tickets for France, Germany and Europe. It provides the most comprehensive offer on the market, with over 20,000 trips available, including all SNCF lines and its low-cost subsidies (iDTGV, OUIGO and iDBUS) as well as Eurostar, Thalys, Lyria and Deutsche Bahn.

## Purchase your train tickets on the go

Capitaine Train users can now simply purchase their tickets within minutes. Travellers no longer need to print out their tickets or collect them at the train station. Instead, compatible tickets such as SNCF or Thalys tickets, can now be stored directly in Passbook or on a loyalty card e.g. Carte Voyageur.

## Save your personal details, once and for all

Every user can create an account for themselves and their family. They can also add all of their discount and loyalty cards to benefit from their relevant advantages. The passenger and travel information are synchronised between the web and mobile app, so a booking may be started on the website, and paid later via the app.

### About Capitaine Train:

With over 125,000 users, Capitaine Train is the first leading competitor of voyages-sncf.com. The company was founded in 2009 by Jean-Daniel Guyot, Valentin Surrel and Martin Ottenwaelter. It has more than 22 employees and sells more than 1,000 train tickets per day. Capitaine Train's goal is to provide a simple, reliable and economical alternative for purchasing train tickets in Europe. Capitaine Train has raised \$2.5 million in 2013 and \$1.4 million in 2012 with Index Ventures and CM-CIC Capital Privé.
